

Luke Salem

Tallahassee, FL • (561) 768-2336 • lhs23b@fsu.edu • github.com/lukehsalem • linkedin.com/in/lukehsalem

EDUCATION

Florida State University — B.S. Computer Science *Aug 2023 – May 2027 • Tallahassee, FL*

- Relevant coursework: Data Structures & Algorithms, Computer Organization, Full-Stack Django Web Application, C# App Development
- Activities: ACM Programming Club, AWS Cloud Club, Project Development Club, Phi Gamma Delta

TECHNICAL SKILLS

Languages: Python, SQL, SAS, C#, C++, Java

Data & Analytics: Pandas, NumPy, PostgreSQL, pgvector, schema design, data extraction & cleaning, ETL pipelines, RAG pipelines, Jupyter, EDA

Frameworks & Tools: Django, Node/Express, Prisma, .NET, ASP.NET, WebAPI, .NET MAUI, Chart.js, Bootstrap

Concepts & Tools: AWS, Supabase, TypeScript, React Native, REST API design, OOP, MVC, data structures, full-stack development, agile/scrum, CI/CD Git, GitHub, SSH, Linux, Excel

EXPERIENCE

Florida Office of Insurance Regulation — Data Analyst II *Jun 2026 – Present | Tallahassee, FL*

- Analyze regulatory and market data for the Life & Health Product Review unit, supporting statistical analysis, reporting, and process automation that informs state oversight of a complex multi-billion dollar insurance market.
- Assist in reviewing insurer filings that incorporate predictive models, SAS, AI/ML and advanced analytics, assessing how these methods are applied within regulated insurance products. Compile and structure data supporting legislative budget requests and internal reporting.

Luke Salem Copywriting — Founder & Owner *Jun 2024 – Jun 2025 | Remote*

- Founded a digital marketing service offering copywriting and email marketing solutions to businesses focused on revenue growth
- Leveraged expertise in outreach, email marketing, and marketing strategy to drive client customer acquisition

RESEARCH

OUYANG Group, Vanderbilt University – Data Mining Research *Mar 2026 – Present | Remote*

- Extract and annotate data from peer-reviewed scientific literature on perovskite oxides and Na-ion layered cathode materials, processing assigned batches into standardized schemas covering synthesis conditions, structural parameters, and electrochemical performance metrics.
- Curate training data feeding the group's Literature Mining Database, a public corpus used to train ML models for materials property prediction.

PROJECTS

OrgFlow *Node/Express • Prisma • PostgreSQL / pgvector • AWS (In Development)*

- Built the backend of a production mobile application for student organization: design PostgreSQL schema and REST APIs on a Node/Express/Prisma backend stack deployed on AWS.
- Built a retrieval-augmented (RAG) data pipeline using pgvector embeddings and LLM providers to power AI-assisted features over organization data.

Django Data Analytics Dashboard *Python • Django • Pandas • Chart.js • Bootstrap 5*

- Built an end-to-end analytics pipeline aggregating NBA statistics with Pandas, modeling relational schemas in Django ORM/SQLite and writing queries for multi-table joins and aggregations
- Designed interactive data visualizations with Chart.js and a responsive Bootstrap 5 frontend; deployed to a Linux server via SSH tunneling and port forwarding

Learning Management System *C# • .NET MAUI • ASP.NET WebAPI • GitHub Actions*

- Built a full-stack LMS in C#, evolving from a CLI console app to a cross-platform .NET MAUI GUI with an ASP.NET WebAPI backend
- Implemented core features including course and assignment management, weighted grading, quiz support, file submissions, and gradebook CSV export

- Managed the full dev lifecycle using GitHub Issues, GitHub Actions for CI/CD, and a sprint-based agile workflow on a forked course org repository

LEADERSHIP & INVOLVEMENT

FSU Student Foundation — Member, Board of Trustees *Dec 2024 – Dec 2025*

- Coordinate outreach events and fundraising initiatives with the Board of Trustees in partnership with SGA and SAA

Florida State Interfraternity Council — IFC Delegate *Jan 2024 – Nov 2024*

- Planned and executed fundraising events in partnership with Jimmy John's and led Spring/Fall charity initiatives supporting the Victim Advocate Program

CERTIFICATIONS

- IBM Agile Development and Scrum — IBM (issued with honors)
- CS50 Introduction to Programming with Python — Harvard Online
